the ills that flesh is heir to for many a century ! The Emperor Aurungzeb, in January 1735, seems to have had something very like it. Khafi Khan says: "About this time (January, 1705), His Majesty fell seriously ill. He felt an extraordinary and acute pain in all his joins extending to every limb. He tried to keep down the sickness, and continued to decide Government matters, but his illness continued, and after ten or twelve days he improved. MISERABLE CONDITION OF RUSSIAN POLAND.

A letter from Russian Poland to a German condition in that province. Neither life nor property are safe, and things are growing werse from day to day. A regular gang bas been formed, sanding threatening letters to persons owning any property offering 'letters of safety" for a heavy black finil and frightening such as of that fact. Chief Justice Smale's remarks may decline to paywhith threats of murger and robbery The proportied classes turn to the lawdourts for redress. But the law courts are more: Sir John Smale's inferences as to the grounds the thioves friends than the allies of honest recently remodelled is dilatory and weariopera d la prima donna.

In the Messrs Kirk and Drew are clever clog dancers on the minds of the public what the jurers second place, the judges are for the most part and went through this part of their performance thought about the matter. To fancy that half a young men sent to Poland from Russia with wrong impressions of what actually occurred at training. They do not know the country, nor place they visited, is a method of explaining its oustoms, nor the character of the people problivities and appear to take a delight in befriending thieves and robbers. The writer declares that pines the last rising, for 14 long years, things have been going from bid to worse in Poland for the sake of Russianisation The country is, indeed, becoming cowed and passive, but what it loses Russia does not gain. For with its national spirit its economic nerve is disappearing, it is becoming impoverished, and losing the last remnant of vigour which might help it to recover its deconomic prosperity. There is nothing for it but decay and ruin.

ALLEGED BOLD PROJECT OF THE

A plan of campaign, as much of a political as of a military character, has been communicated to the Turkish authorities, and has apparently heen accepted by thom. It is that the Porto should concentrate all the forces at its disposal in the Quadrilateral and the passes leading to it. thus leaving the road to Constantinople perfectly open. Constantinople itself would be strongly garrisoned, and the Russians practically inwited to come and take it, or confine their efforts to the reduction of the whole Quadrilateral with its. fortresses of Rustchnok, Silistria, Schumla, Rasgrad. Varna, and the lines and earthworks which would be thrown up in various points and defended with the energy of which the defence of But the situation in the Quadrilateral would be fell on account of the impossibility of keeping open the communications with it. But in the the capital could always be kent open the control ved Varna, through which any amount of the material at the disposal of the Turks from all sources, covert and overt, could be poured. It is quite impossible to form any estimate of the time that would be requisite for the Russians to end the campaign if the Turks siego material from Plevna and elsewhere would, it is true, be favoured by the hardness of the roads in winter time; but this advantage would be more than counterbalanced by the difficulties. of constructing siege works and trenches, &c., in the frezen ground. Nor is this all. The matter is to be still further complicated by fresh reinforcements from Egypt to the number of 20,000 men for the protection of Constantinople can be overcome. Further, the policy thus recommended in Europe, it has been suggested should also be extended to Asia, and the same military tactics adopted there as in European Turkey with no doubt certain medification

> RUSSIAN TREATMENT OF PRISONERS.

The horrors of Plevna, on which we had to comment the other day, are not exceptional instances of Russian-inhumanity as displayed in the treatment of the Turkish prisoners. Not only the wounded left in Plevna, but the prisofiers taken at the sortie have had bitter experieuce that the tender mercies of their enemy are cruel. A telegram in the Vicana paper, the Neue Freie Presse, states that these wretched Moslems are being forwarded to the interior of Russia barefooted and half naked, although the cold is most intense. The natural result is that many of them are being killed off like flies on the way to their destination. In the face of the indignation so vehemently poured forth on the Turks for their alleged barbarities to the Russian prisoners and wounded, it is necessary to direct special attention to such outrages on humanity. Killing prisoners with the bayonet or the rifle is not half so cruel as treating them with such merciless neglect of the most elementary necessities that a lingering and torturing death is certain in the case of many of them. No evidence has, however, been forthcoming that the Turks killed the Russian pri ROLLETS after surrender. One very zealous philo Russian correspondent of a morning contemporary suggests that Ghazi Osman should be tried for the slaughter of the wounded round Plevna; for this is what his statement that he has heard a rumour that he is to be tried amounts to. He German wounded and prisoners that fell into his hands it would have goge hard with him when he surrendered. No doubt it would, and nobody would have complained if in such a case he had a very short shrift indeed. But no particle of evidence has been brought forward that Ghazi Osman killed the prisoners taken by his men. That cruel and ruthless deeds were done by Moslem fanatics in the fights round Plevna is too true; but of the sleughter prisoners after capture there is no proof whatever: while it is certain that the Russians are morally quilty of the deaths of their prisoners by their neglect of the most elementary precentions dictated by humanity. - Globe.

CARD PLAYING FOR SOLDIERS. The deliberate introduction of card-playing as a means of amusing our soldiers must atrike old priny disciplinarians as a movement which can have nothing to recommend it but its novelty. The pleasures of the reading room may be a harmless indulgence, but the addition of a card table to the bookshelf can only be disastrous in its results. However, the experiment has been made and reported on; the new amusement has been permitted and even encouraged, and we now learn with what results That there should have been in some cases abuse of the privilege is not to be wondered at. MAILS EXCHANGED WITH MANILA AND SAIGON The Philippine Islands being now admitted [112 CARGO, will leave this Port for the above into the General Postal Union, it follows that all paid correspondence received from Manila in the mails will be delivered free by this Office don as well as for Marseilles, and accepted in and that all paid correspondence sent to Manila Article IX. of the Postal Treaty of Berne Cargo will be received on board until 4 P.M., provides that " Neither the senders nor the adpecie and Parcels until 3 P.M. on the 20th dressess of letters and other postal packets shall February, 1878. Contents and value of Packages are duty other than" the recognised rates levied (in the case of paid correspondence) by the despatch ing office. It is hoped that any extra charge, or apparently extra charge, will at once be-

brought to the notice of the proper authorities. in either Colony. The above does not apply in any way to loose letters sent outside the mails. These will always be charged on arrival in Hongkong, and probably the Manila Office will adopt the same

Complaints are sometimes received of extracharges on correspondence exchanged between this Colony, and Saigon, but it is believed it would be found in all cases that the letters, &c., had been sent loose.

Many boxes of letters are received at the Post Office not sealed, that is to say, the box is fastened with sealing wax, but there is no impression of a scal.

The attention of boxholders is called to the necessity of carefully sealing such boxes with patched for San Francisco, vid Yokohama, some recognisable seal, and of sending a chiton or about FRIDAY, the 1st March, at 3 P.M., book or receipt with them. The omission of taking Cargo and Passengers for Japan, the the latter precantion leaves a doubt as to whether the contents of the box ever reached the Post Office: the omission of the former, as to whether part of them might not have been abstracted for the sake of the Postage Stamps. To provide means of remitting small sums of money to or from this Colony and between the Ports of China and Japan, the Postmasters and Agents of this Office will in future be allowed (but not required) to purchase Hongkong Postage Stamps from foreign residents.

Between Hongkong and Shanghai, or Hongkong and Yokohama, however in either direction; Money Orders must be used The Stamps tendered for sale must not ex ceed \$25 in value, must be perfectly clean, in nood condition, and in strips of at least two, as go separate Stamps will be purchased. They must be presented personally or accompanied

Letters containing Stamps should be registered, and the Stamps should be secured from observation.

Most countries to which Hongkong forwards Correspondence having joined the General Postal Union or being probably about to do so, it is necessary that the following rules be

"1.—No Letter or Packet, whether to be registered or unregistered, can be received for Postage if it contains gold or siver money, jewels, precious articles, or anything that, as a general-rule, is liable to Customs duties. 2.—This Regulation prohibits the sending of Patterns of dutiable articles, unless the quantity sent be so small as to make the sample of n

The public is reminded that, in China and Japan, there is no much thing as Parcel Post. Much trouble and disappointment is caused by persistent attempts to send small-valuable triffes through the Post. Fans, Curios, Articles of Dress, Fanoy Work, and similar presents are continually being refused, the senders having often spent more in Postage than would have Is the best medium for Advertising among the neid the freight by steamer.
